## 1200-3150 Amp switches, 600V

| UL | IEC | Maximum horsepower rating |  |
| :---: | :---: | :---: | :---: |
| purpose amp rating | amp <br> rating | The US National Electric Code does not specify HP ratings for switches this large. Please select a switch based on $115 \%$ of application FLA. For example: a motor with an FLA of 800A would require a 1200A switch: $800 \mathrm{~A} \times 115 \%=920 \mathrm{~A}$, the closest higher rated switch is 1200A. | Catalog number |

| Mechanical interlock | BDF1200－ <br> BDNF3150 | 2.64 | BDZW13 |

6 or 8 pole－BDZW9
6 （8）pole mechanism allows two switches controlled by one handle to open or close simultaneously．One shaft included． Equipment required for a complete installation：
－One conversion mechanism．
－Two disconnect switches
－One handle
－One addtional shaft
（Only one shaft is included with mechanism）

Transfer－BDZW12
Transfer mechanism manually transfers between two power sources using two switches and a center OFF position． A 3 position handle is included．
Shafts included．
Equipment required for a complete installation：
－One conversion mechanism
－Two disconnect switches

Bypass－BDZW13
Bypass mechanism operates three switches：Two switches in series and one changeover switch to allow power bypass． A 3 position handle is included．
Shafts included
Equipment required for a complete installation：
－One conversion mechanism
－Three disconnect switches

Mechanical interlock —BDZW15 Mechanical interlock mechanism prevents both switches from being in the＂ON＂posi－ tion at the same time．Handles are not included．
Equipment required for a complete installation：
－One conversion mechanism
－Two disconnect switches
－Two shafts
－Two handles
