[REFERENCE]

- (note 4) Derating curve takes manufacturing tolerances into consideration as well as uncertainties in temperature measurement and the measuring set up and is derived from the base curve multiplied by 0.8 calculation.
- (note 5) The value of rated current differs depending on the ambient temperature.

 it is recommended to use the product within the derating curve zone.

 if used under UL or TUV standard, please use within the standard specification.
- (note 6) Measurement method of derating curve is shown below.
 - Test Specimen: used FX30B-2P-3.81DS. used FX30B-2S-3.81DS.
 - Test condition: turn on electricity under the static state and measure. (Test report # TR570E-20627)
